

# Econometric Methods for Political Analysis

Volume II: Causal Estimation for Observational Studies

Kevin Lingfeng Li

# Table of contents

<b>I</b>	<b>Selection on Observables</b>	<b>2</b>
1	Selection on Observables Design	3
2	Matching, Weighting, and Regression	4
3	Partial Identification and Sensitivity Analysis	5
<b>II</b>	<b>Instrumental Variables</b>	<b>6</b>
4	Insutrmental Variables Framework	7
5	Instrumental Variable Designs	8
<b>III</b>	<b>Quasi-Experimental Methods</b>	<b>9</b>
6	Simple Differences-in-Differences	10
7	General Differences-in-Differences	11
8	Regression Discontinuity	12
9	Survey Experiments	13

## Part I

# Selection on Observables

## Chapter 1

# Selection on Observables Design

## Chapter 2

# Matching, Weighting, and Regression

## Chapter 3

# Partial Identification and Sensitivity Analysis

## **Part II**

# **Instrumental Variables**

## Chapter 4

# Insutrmmental Variables Framework

## Chapter 5

# Instrumental Variable Designs

## Part III

# Quasi-Experimental Methods

## Chapter 6

# Simple Differences-in-Differences

## Chapter 7

# General Differences-in-Differences

## Chapter 8

# Regression Discontinuity

## Chapter 9

# Survey Experiments
